
AI agents
use the AI model, or simple rules in demo mode
Request reader
reads your sentence, asks what is missing
Researcher
chooses the searches, at most 8 steps
Guide
writes a visit guide for each stop
Change reader
turns your words into edits
Four helpers use the AI model. Each has one narrow job, and code checks what it returns.
Plain code
the same sum every time
Planner
builds the days and prices every item
Checker
adds up the total, tries one fix at a time
edit
The coordinator, also plain code, passes the work along and stops after five fixes. The AI never adds up the money.
still over
You
the final say
types a sentence, answers what is missing
chooses how to close the gap
asks for changes, or says OK
calendar file, after OK
