Try it in about 3 minutes

Install, start the server and the page, open it in a browser.

No keys needed. Demo mode runs the same steps on rules and labelled sample prices, all but the visit guides.

Deploy: one URL

A blueprint file sets it up. An access code and 60 requests per visitor per hour protect the search quota.

Go live one key at a time

- **OpenRouter**
  AI agents, any model
- **SerpApi**
  flights, hotels, events
- **Ticketmaster**
  events, any date
- **Google Places**
  sights, optional

Weather needs no key.
