1 Alex asks

Alex, a student (an illustration)

Chicago for 4 days, budget $600

$600

2 It asks back, never guesses

Where are you leaving from?

What date?

From Boston, leaving Nov 20

3 AI agents research

8 flights

18 hotels

59 events

rain and cold typical for those dates, so indoor stops too

4 The critic, plain code, checks the money

first plan

$1,235

5 repairs

cheapest it built

$780

$180 over the $600 budget

5 Alex decides

raise the budget

shorten to 2 nights

drive instead

The plan is rebuilt and checked again, then waits.

Approve: a calendar file. Nothing is booked.
